

# ACOUSTIC POSITIONING

## PAM DIGITAL TESTER/CHARGER

### KEY FEATURES:-

- Saves downtime and saves money - allows checking of transponders before they enter the water.
- Charges many known beacon types. Easy to use.
- Search function
- Tests Responders too! Responder/charge lead supplied.
- Mains / Battery operation for on deck use.
- Field upgradeable by email.
- New...PAM now also includes ranging and AAE release software as standard.
- Once tried, this unit quickly becomes a 'MUST HAVE' for every workshop or ship.

The Model 2520 is the lowest cost unit based on our PAM technology and carries out the functions of testing and charging a wide variety of beacons including those operating with Simrad HiPAP, Simrad HPR, Sonardyne USBL and ORE Trackpoint II.

A large LCD display and 7 'soft keys' offer the friendliest of intuitive user interfaces. An internal battery pack facilitates cord-free on deck use. The unit also allows cycle charging of most available mini and midi beacons.

The 2520 is upgradeable with ranging software, release software, FSK telemetry software, and MFSK software / Hardware.

The AAE PAM Tester / Charger has been designed to be a highly expandable, versatile and invaluable engineer / operator 'tool'.

Beacon compatibility	:Simrad HiPAP / 400 Simrad HPR 300 series Sonardyne USBL Emergency A & B ORE Trackpoint II (MF)
Battery life (tester)	:10 hours minimum
Compatibility of charger:	:All AAE mini, midi and larger beacons Simrad RPT Simrad MHT Sonardyne 7656 ORE Multibeacons
Mains Voltage	:100 - 250VAC @ 75VA
Size	:350 x 250 x 120mm
Weight	:5kg

The unit is supplied with mains lead, test transducer, responder trigger / charge lead, RS-232 lead, C.D. and operating manual.
