CITADEL[®] CT-EK Analog

Robust, Reliable, and Rugged CT

Conductivity and Temperature Sensors
with Analog Output for Integration
into User Systems

Teledyne RD Instruments CITADEL CT-EK Sensor provides high-accuracy conductivity and temperature measurements in a package that can be readily adapted to various user platforms. The instrument relies on an innovative, inductively coupled conductivity sensor, which provides high-accuracy, stable readings. The sensor is self-flushing, so no pumps are required. A high-grade Thermistor provides stable temperature readings for calculation of high-accuracy salinity and sound velocity.

Separate models are available with the following options:

- Shallow- (500-meter) or deep-water (7000-meter) construction
- Internal or external temperature sensor (faster response)
- Regular or short stem (shallow versions only)

A large ceramic conductivity cell is also available for improved accuracy and faster response.

PRODUCT FEATURES

- Self-flushing sensor, with no pump or other moving mechanical parts to fail
- High-stability inductive conductivity sensor can be cleaned without affecting calibration
- High-grade thermistor provides high-accuracy temperature
- Low-power operation (<65 mW)
- Fast Power-on to Sample-time provides useful data fast
- Internal references enable continuous self-calibration of electronics

1 Specified at 22°C and 35PSU

2 Defines as root sum of the squares (RSS) of endpoint non-linearity, repeatability error, and calibration uncertainty.

3 Measured over a typical one-year period.
